Sub:- Empanelment of Mediators by Construction Industry Arbitration Council

It is my pleasure to announce that Construction Industry Arbitration Council has decided to draw up a panel of Mediators, similar to the one of Arbitrators.

This has been done in response to the ever increasing demand from all the corners to have such a panel in place and to train mediators so that the Med- Arb activities could be seamlessly taken up during the arbitration proceedings if need be. Besides this, the industry is in demand of trained Mediators to take up the Construction related Mediation and adjudications. As it is evident, Construction Mediation, will be distinct from the usual commercial and community Mediation and will be a highly technical activity.

CIAC is planning to organise a 40- hour special training for Construction Mediation to prepare a cadre of professionally trained mediators especially to cater to the needs of construction Industry.

I would like to invite lawyers, engineers and other professionals having interest in the above to contact Sh. Amod K. Dalela, Principal Advisor cum Hony- Registrar, CIAC (amodkdalela.ciac@gmail.com) to register for empanelment and join the training of Mediators on Construction Mediation, which will be announced very soon.

Yours sincerely,
For Construction Industry Arbitration Council

(Dr. P.R Swarup)
Member Secretary, CIAC
